

Assessment Matrix for Team Design Projects

Final Team Report (worth 25%)

Grade Range (Highest to Lowest)	A1, A2, A3, A4, A5	B1, B2, B3	C1, C2, C3	D1, D2, D3	E1, E2, E3	F1, F2, F3	G1, G2, H	Grade Awarded
Descriptor	Excellent	Very Good	Good	Satisfactory	Weak	Poor	G: Very Poor H: No Attainment	
Literature Survey (Weighting = 1)	<i>Exemplary range of references used and discussed in great depth, indicating comprehensive background reading.</i>	<i>An appropriate range of relevant references used and discussed suggesting substantial background reading.</i>	<i>Sufficient references used and discussed to indicate a good level of background reading.</i>	<i>Perhaps just enough references used and discussed to suggest some background reading was undertaken. Too many "www" references.</i>	<i>Too few relevant references used and discussed and possibly an over reliance on www sources indicating insufficient background work.</i>	<i>Only a few references used and discussed and majority are irrelevant. Little evidence of background reading.</i>	<i>Very few (or no) references used or discussed. No evidence of any background reading.</i>	
Presentation & Figures (Weighting = 1)	<i>Professional standard of presentation. All illustrations are well formatted and presented.</i>	<i>A clear and consistent presentation style making it easy to read. Most of the figures are clear and well presented.</i>	<i>There are some minor flaws in the presentation and the clarity of the figures, but overall a well presented report.</i>	<i>A number of basic errors present – inconsistent use of styles, margins etc. Figures are satisfactory.</i>	<i>Significant flaws in the presentation detracting from the overall impression of the report. Flawed figures, e.g. badly drawn and untidy,</i>	<i>Unacceptable presentation: untidy and inconsistent use of styles. Figures are messy and unclear.</i>	<i>A messy report, e.g. no evidence of any effective effort on the quality of the presentation. Report is hard to follow due to unclear figures.</i>	
Technical Content & Quality of Analysis (Weighting = 3)	<i>Well informed and authoritative discussion and a comprehensive analysis of a significantly complex technical problem.</i>	<i>Clear and reasoned arguments backed up with a significant analysis indicating a very good grasp of a difficult technical problem.</i>	<i>Arguments presented are of a reasonable technical level, supported by a good quality analysis, and have been well considered and clearly stated.</i>	<i>The arguments presented are of reasonable technical depth, supported by some analysis and show a satisfactory understanding.</i>	<i>Only limited critical discussion of the technical problem studied. Little analysis or a low level of analysis. Suggests limited understanding of problem.</i>	<i>Very little evidence of critical discussion of technical work or results. Superficial understanding of problem. Minimal analysis included.</i>	<i>The lack of quality of the technical argument suggests that the student has very little understanding of the problem. No analysis.</i>
