Grade Range (Highest to Lowest)	A1, A2, A3, A4,A5	B1, B2, B3	C1, C2, C3	D1, D2, D3	E1, E2, E3	F1, F2, F3	G1, G2, H	Grade Awarded
Descriptor	Excellent	Very Good	Good	Satisfactory	Weak	Poor	G:Very Poor H: No Attainment	
Delivery (individual) (Weighting = 1)	<i>Confident, clear and unhesitating delivery. Held attention of audience. Easy to follow arguments.</i>	<i>Was confident but perhaps a few minor flaws (such as hesitation, talking too fast etc).</i>	<i>Perhaps slightly lacking in confidence or possibly not speaking quite clearly enough.</i>	<i>Overall a reasonable delivery, but there were issues regarding clarity, or fluency.</i>	<i>A hesitant or unclear delivery made understanding the presentation difficult.</i>	<i>Hesitant, unclear, monotonous, hard to maintain attention. Difficult to follow argument.</i>	<i>No fluency or clarity. Too many basic errors, e.g. mumbling or talking to screen.</i>	
Slides (individual) (Weighting = 1)	<i>Exceptionally clear slides. Simple design, large enough font, not too much material on slides. A professional quality presentation.</i>	<i>Clear slides but perhaps the occasional flaw (font size, colour scheme etc), but overall impressive presentation.</i>	<i>There may be a number of errors, on the slides but overall still clear and flaws do not detract significantly from content.</i>	<i>Consistent errors on many slides but not of a significant nature. A reasonable effort but flaws have detracted from presentation.</i>	<i>Significantly flawed slides. Basic errors such as small font size, too much content on slides, over-elaborate design.</i>	<i>Not only are slides poor, but they make it difficult to follow argument.</i>	<i>Very poor slides, basic errors on every slide. Impossible to follow technical argument.</i>	
Technical Content (individual) (Weighting = 2)	<i>There is a good quantity of high level technical content in the presentation.</i>	<i>Overall, the content is sufficient to give the audience a clear account of a challenging technical task.</i>	<i>The presentation has a good level of technical content with only a small amount of superfluous information.</i>	<i>There is some irrelevant non-pertinent material, but overall the technical content is satisfactory.</i>	<i>The presentation has only limited technical content with too much general background information.</i>	<i>The technical content is relatively low in terms of level and quantity.</i>	<i>Superfluous or possibly no relevant technical content evident.</i>	
Response to Questions (I) (individual) (Weighting = 3)	<i>Answered all questions clearly and confidently. Gave the impression of having an excellent grasp of the subject.</i>	<i>Answered all questions competently. Has clearly developed a very good understanding of the subject</i>	<i>Answered most questions well enough to conclude that the student has a developed a good understanding of the subject.</i>	<i>Gave some good answers but also some poor ones. Evidence of reasonable understanding of the subject.</i>	<i>Answered the majority of the questions poorly suggesting a lack of knowledge in the subject.</i>	<i>Gave some superficial answers, but appears to have very little understanding of the subject.</i>	<i>Unable to give any sort of competent answer to any question.</i>
