

TDPS Demonstration Assessment Matrix**Saturday 6th June 2026**

Team No:

Marker name:

Task	Sub-task	% Weight	Interference/restart	Total task marks	Comments
1. line tracking	1	10			
	2	10			
	3	10			
	4	10			
	5	10			
2. LoRa comms	1	10			
	2	10			
3. Radar	1	30			
Total					
Checklist deductions					
Grand total (out of 100)				Completion time (Min:sec)	

Checklist: (Any breach, deduct up to 25% depending on severity)

1. Battery brand: four approved brands are permitted — Tattu R-Line, Ovonic, Gens Ace, and WHEELTEC. Maximum battery capacity: 5300 mAh.
2. All code is preloaded onto the microcontroller; no remote control of the vehicle is used.
3. Line tracking is performed using a camera or sensor, not by pre-programming the route.
4. A 24 GHz radar module is used for obstacle detection.
5. A LoRa-compliant transmitter is used for the wireless communications task.
6. A screen (LCD, TFT, or OLED) with a maximum size of 4.5” is used, and the obstacle must be visible on the screen.
